SELF-EVALUATION

- **Professional background:** During school, I had a strong interest and pursuit in front-end development and computer technology professional background. I participated in the front-end design of multiple projects and loved line segment technology. I continued to pay attention to cutting-edge technology and mastered solid front-end development knowledge. I have front-end development and project skills. Collaborative experience.
- **Front-end development:** Have good code programming and technical document writing skills, be able to understand the relationship between user needs and the core logic of the project, and know how to cooperate with the team to implement development plans and design page prototypes.
- **Project management:** Good at understanding project planning, user needs analysis, software design, paying attention to overall details, aesthetics and user experience.

EDUCATION BACKGROUND

University of Sydney │ Bachelor of Computer Design   **2021.03 – 2024.04**
Related courses: Advanced web design, design programming, interaction design, information visualization design, interactive product design, etc.

University of Technology Sydney │ Bachelor of Design and Architecture   **2020.03 – 2021.01**
Related courses: Future design theory, design process guidance, design-related software, architectural drawing, etc.

WORK EXPERIENCE

university project   **2022.08 - 2022.12**
- As a member of the team, I was responsible for the design and implementation of the front-end interface and worked closely with development members. The collaborative work progressed smoothly and the website was optimized to improve user experience.
- Communicate with the team based on design and product requirements, build the project structure, conduct interface design and product design, and user experience surveys.
- Technical support includes HTML, CSS, JS and interactive products.

Modular Building Systems   **2020.06 - 2021.02**
- Assisted leading workers on the construction program of modular steel prison cells at Modular Building Systems Pty Ltd (MBS).
- Read construction drawings and floor plans independently. Measure the scale of the construction, practice laying floors and drywall, and install doors and door locks.
- Assist team workers with daily tool inspections, hammock inspections, lifting materials and using cranes to inspect roof construction to ensure worker safety.
- Use design software such as AutoCAD, SketchUp, Photoshop, and Illustrator to help the team understand drawings and customer needs.

Sushi Hub   **2018.02 - 2018.12**
- Assist the manager in managing cash receipts and expenditures projects and financial reporting.
- Learn about cash flow management.
- The current team leader summarizes the business process daily.
- Practice your English speaking skills.

SKILLS

- HTML、CSS、JavaScrip、P5.JS
- AutoCAD、SketchUP
- Photoshop、Illustrator、UI Design
- Power Point、Word

LANGUAGE

- English (Proficient)
- Chinese (native language)

QUALIFICATION

- General Construction Induction
- Data Science Fundamentals
